For Immediate Release:

Technology Pathways adds new President and CEO

Experienced executive joins to lead company growth initiatives.

Coronado, Ca, October 6, 2003, Technology Pathways, LLC announced today that Steven Richardson has joined the company as President and CEO. This addition marks the beginning of a new growth phase for Technology Pathways in existing and new markets.

“My vision is to build on the success that ProDiscover[®] is having in the computer forensics market. It is being used in major corporations and law enforcement agencies, and has been successfully been used in both criminal and civil court cases. Next, I envision us expanding our products and technologies into the corporate security market for incident response, system auditing and internal investigations. Beyond that, I see great opportunity in the emerging electronic discovery market for civil litigation” said Richardson. “Our strategy is really quite simple. We will provide high quality security tools and services at affordable prices. We will support our customers, listen to their needs, and respond quickly. And we will leverage our field proven technology to expand into new markets.”

“We are excited to have Steve aboard” stated Christopher L. T. Brown, founder and CTO of Technology Pathways and former President. “The skills Steve brings to the management team compliment the skills of the other staff members and he has brought a renewed vitality to the company. I look forward to working with Steve in his new role.”

Richardson has 27 years in high tech management in a variety of large and small companies. He received his electrical engineering degree from MIT and worked as an engineer on classified systems for the Naval Ordnance Lab. He then returned to school, receiving his MBA from Harvard. Starting at Hewlett Packard in the mid-1970's, he moved progressively through management positions in the peripherals and networking groups. He left HP to become Vice President of Marketing at Compression Labs, a leading supplier of video conferencing systems. Moving to San Diego in the mid-1990's Richardson has been in senior management positions at Proxima, Overland Data, and etNetworks.

Founded in 2001, Technology Pathways, LLC is a leading edge provider of computer security tools and services for the Corporate IT, government, education, and legal communities. The ProDiscover family of products provides affordable software

solutions in the areas of computer forensics, internal investigations, incident response, system auditing, and electronic discovery. Technology Pathways products and services are utilized nationally by major corporations and government agencies.
